HIPAA Security Risk Assessment for Healthcare

A comprehensive annual risk assessment that ensures HIPAA and MIPS compliance, protects against costly penalties, and provides a clear roadmap to reduce cyber risk.

SERVICE OVERVIEW

A **Security Risk Assessment (SRA)** is a mandatory annual requirement under the HIPAA Security Rule (§164.308) and a critical element of MIPS compliance. More than a regulatory checkbox, a HIPAA SRA provides the foundation for protecting patient data, reducing cyber risk, and safeguarding hospital revenue.

BlueOrange Compliance, a CloudWave company, delivers **comprehensive, hospital-focused SRAs** that align with **NIST CSF 2.0** and HIPAA standards. Our experts go beyond identifying vulnerabilities—we provide a prioritized, interactive action plan that empowers hospitals to remediate risks quickly and effectively.

FEATURES

- **HIPAA-Compliant Risk Analysis:** Full evaluation of ePHI access, storage, and transmission workflows.
- **Internal & External Vulnerability Scans:** Coverage for up to 5,000 internal devices and 50 external IPs.
- **Policy & Procedure Review:** Assessment of security governance and compliance documentation.
- **Physical Environment Analysis:** Identification of facility-level risks and safeguards.
- **Risk Scoring & Prioritization:** Quantified scoring with actionable recommendations.
- **Interactive Action Plan:** Customized, prioritized roadmap with expert guidance calls.
- **MIPS Readiness Status:** Validation of compliance to support reimbursement requirements.

BENEFITS

- **Regulatory Confidence:** Meet HIPAA and MIPS requirements with a validated, defensible assessment.
- **Financial Protection:** Avoid OCR fines (up to $1.5M per violation) and MIPS penalties (up to 9% revenue impact).
- **Improved Security Posture:** Identify and remediate vulnerabilities before attackers exploit them.
- **Operational Efficiency:** Reduce compliance burden with structured reporting and guided remediation.
- **Board & Executive Visibility:** Clear, easy-to-understand reporting tailored for multiple audiences.

> Our experts go beyond identifying vulnerabilities, we provide a prioritized, interactive action plan that empowers hospitals to remediate risks quickly and effectively.

CloudWave | BLUE ORANGE COMPLIANCE
A CloudWave Company

WHY PARTNER WITH CLOUDWAVE/BLUEORANGE COMPLIANCE?

BlueOrange Compliance has a proven track record in helping hospitals meet the most demanding privacy, security, and compliance standards. Now as part of CloudWave, we combine regulatory expertise with advanced cybersecurity services to deliver end-to-end protection—aligning compliance with patient care.

- **Healthcare-Specific Expertise:** Decades of experience delivering compliance and risk management exclusively for healthcare.
- **Proven Methodology:** NIST CSF 2.0–based assessments tailored to hospital environments.
- **End-to-End Coverage:** From compliance assessments to advanced cybersecurity services through CloudWave.
- **Trusted Results:** Hundreds of successful audits and assessments supporting hospitals nationwide.

TAKE THE NEXT STEP

Don't wait until compliance deadlines or cyber incidents put your hospital at risk. Partner with BlueOrange Compliance for a HIPAA Security Risk Assessment that strengthens both compliance and patient safety.

ABOUT CLOUDWAVE

CloudWave is a full-service cybersecurity and cloud services provider built exclusively for healthcare. Protecting over 350 hospitals and health system environments, CloudWave delivers end-to-end solutions that combine secure hosting, IT operations, and 24/7 threat detection and response. Services include managed security, risk and compliance, disaster recovery, systems management, and cloud optimization—all delivered with a healthcare-first mindset. Powered by AI-driven security operations and supported by U.S.-based Network and Cybersecurity Tactical Operations Centers, CloudWave provides a cyber-ready foundation for safe, uninterrupted patient care.

ABOUT BLUEORANGE COMPLIANCE

BlueOrange Compliance, a CloudWave company, is a leader in information privacy and security, regulatory compliance, and risk management services. Together with CloudWave, BlueOrange Compliance delivers end-to-end cybersecurity solutions for healthcare organizations facing increasingly complex compliance landscapes, including HIPAA, HITECH, OCR, and other industry-specific regulations.

The combination of our proven track record in compliance audits, risk assessments, cybersecurity testing and training, and cybersecurity consulting and risk management services along with CloudWave's advanced threat detection, incident response, and cloud infrastructure capabilities results in a comprehensive set of offerings that empower healthcare organizations to secure sensitive data, streamline compliance efforts, and mitigate evolving cyber threats.
