

The TENA® Total Care approach can be customized to suit each customer's specific situation with follow-up support by our Clinical Consulting Team dedicated to continence management. Our complete range of high-quality continence products help care providers use better, use less in more places to deliver high-quality continence care and achieve greater value throughout their business.

TENA's comprehensive clinical services include:

- **Staff In Services:** product application, sizing, peri care, skincare, and sleep hygiene
- **Product recommendation services** based on specific resident assessments

Real World Examples

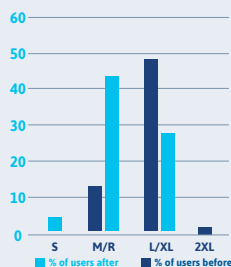

These charts highlight real-world examples of homes that have seen value from TENA's products, clinical support and educational services. It features three long term care facilities that have utilized our products and services and reported positive change.

Home 1¹

Accurate Sizing Improvement

Small: 0 → 4 residents
 M/R: 14 → 43 residents
 L/XL: 48 → 17 residents
 2XL: 2 → 0 residents

Sizing Improvement

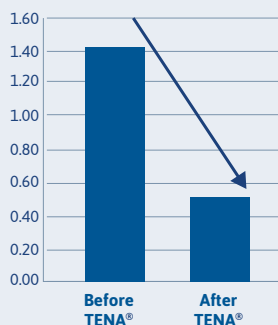

This redistribution reflects more precise assessments and better alignment between resident needs and product selection.

Home 2²

Time Spent

Hours spent per resident/day on incontinence related care.

This graph depicts the time spent by hours per resident/day on incontinence related care before and after switching to TENA®.

Home 3³

\$ Cost Savings

- **44%** estimated reduction in daily spend on cleansing & protective products.
- **\$474** monthly reduction in incontinence care product costs.

References:

1 *Based on data reported by a 68 bed long term care community to the TENA sales/clinician team
 **Live staff education (3 shift in- servicing) was provided including: Appropriate selection and use of the products along with the importance of body close fit sizing.
 2*Based on data reported by 60 bed facilities to TENA sales/clinician team
 **Estimate based on estimates and other data reported by facility and assuming an average change time of 10 minutes.
 3 *Based on data reported by a 50 bed transitional care unit. Infection data from February and April 2025.
 **Based on feedback from a survey of 6 staff members
 The reference cases above reflects the experiences of one or more facilities and contain estimates based on data reported by the facility. Results may not be typical. TENA® skin care products are not intended to treat, cure, or prevent infections. Outcomes may vary based on protocols, staff practices, and other contributing factors.

*Product recommendations are informational only and require approval by facility's responsible care team.
