Case Study: Foodservice Supplies

Watergater Valve Case Study

FOODSERVICE SUPPLIES

The Vollrath Company

The Vollrath Company is one of the oldest foodservice supplies manufacturers in America today. Headquartered in Wisconsin, this industrial giant was looking to reduce the cost of metered water expense in the manufacturing of commercial foodservice supplies. They turned to Watergater Valve to help save on their water and sewer expenses.

With Watergater valves installed on the two 6" water lines feeding their Sheboygan facility, The Vollrath Company has recognized an average metered water and sewer expense savings of 10.12%, which works out to nearly \$30,000 of savings annually for the manufacturing facility.

10% Air in Water Delivery Reduced to 0%
10% Annual Water Savings = \$28,828

\$257,389
